

ESA

LEED® and Sustainable Design

ESA is focused on developing Healthy and Sustainable Built Environments

Thinking about going green?

ESA will guide your project from concept to certification.

Services Offered:

◆ **Planning:**

LEED® project planning involving the Owner, Designers, and Contractors smoothly integrates sustainable design concepts into all levels of the project.

◆ **Commissioning Agent:**

LEED® AP Commissioning Agent contributes to multiple LEED points and helps ensure project success.

◆ **Project Management:**

Project management services help integrate the design and coordination of client specialty subsystems including building automation, security, test and balance, fire, IT, telecom and other specialties.

Boulder County

Our LEED® Accredited Professionals can assist any project in attaining its sustainable design goals.

Benefits:

- ◆ Sustainable building practices can substantially reduce or eliminate negative environmental impacts and improve existing unsustainable design, construction, and operational practices. Sustainable design measures reduce operating costs, enhance building marketability, increase worker productivity, and increase indoor air quality.
- ◆ ESA’s experienced professionals can guide any LEED® project smoothly from concept to certification.
- ◆ ESA is knowledgeable of sustainable design techniques and emerging green building technologies.
- ◆ Streamline the process with ESA being involved early in the project as a LEED™ AP and throughout the project as commissioning agents.
